MyCo is a SaaS product that revolutionizes the way companies work, with a comprehensive & user-friendly platform for all management & engagement needs in a single app.

# DISCONNECT(S) EXISTING IN COMPANY(S) TODAY

## Payroll Automation

Companies have evolved with payroll management tools, but biometric machines only track attendance, leaving HR teams to manage leaves & expenses on separate portals like email & accounting software.

## Team Tracking

Employers struggle to track field team activity despite investing heavily in their sales force.

## A Platform to connect employee with employer & vice-a-versa

Traditional HRMS doesn't come with any portal for an employee to communicate with the employer.

## Performance Management

Managers have traditional work evaluation methods & templates to measure staff productivity. Many tasks with different priorities & deadlines must be assigned. Without automation tools, organizations may face chaos due to human limitations.

# WITH MYCO WE SOLVE CHALLENGES

**CHPL**
